

Objective:

You are required to develop an interactive BI dashboard using a BI tool of their choice (e.g., Power BI, Tableau, Looker, etc.) based on the provided dataset. The purpose of this task is to assess your creativity, analytical skills, and ability to extract meaningful insights from data.

Dataset:

Guidelines:

- The dashboard must be interactive, to explore various aspects of the data intuitively.
- There are no predefined questions; you are encouraged to identify key insights based on their analysis of the dataset.
- The focus should be on creating meaningful visualizations that effectively highlight actionable insights.
- The dashboard should be user-friendly with clear labels, titles, and explanations to guide the audience.
- The dashboard should be publicly accessible. ****important****
